

ADDON COURSES (2021-22) – Brochures

S.No	Name of the Addon Course	Page No.
1.	Arduino and interfacing to different electrical devices	3-4
2.	Python Programming	5-6
3.	MATLAB, SIMULINK for Electrical Engineering Applications	7-8
4.	IoT using Aurdino	9-10
5.	Green Energies	11-12
6.	Transmission and Braking system of EV	13-14
7.	3D-Printing technology	15-16
8.	IoT based Embedded applications using Rasberry pi and Python Programming	17-18
9.	Joy of computing using Python	19-20
10.	Introduction to MATLAB	21-22
11.	Python Programming Essentials	23-24
12.	PCB Design & testing	25-26
13.	Embedded system design using MSP430 Microcontroller	27-28
14.	Micro controller based system design	29-30
15.	Advanced Radar signal processing	31-32
16.	Essentials for Competitive Programming	33-34
17.	Online Privacy	35-36
18.	Android Application Development	37-38
19.	Design for IoT	39-40
20.	Cyber Security Essentials	41-42
21.	Fundamentals and Applications in Computer Vision	43-44

22.	Data Science for Engineering	45-46
23.	Advanced Mobile Applications	47-48
24.	Power BI Reporting	49-50
25.	3D Animation Essentials	51-52
26.	Scripting Languages for Web Development	53-54
27.	Cultural Management	55-56
28.	SAP FICO	57-58
29.	SAP Payroll	59-60
30.	Stress Management	61-62
31.	Career Planing	63-64
32.	Legal Rights of Women	65-66
33.	Critical Thinking	67-68
34.	Hardware Maintenance	69-70
35.	Basics of Web Designing	71-72
36.	Introduction to Artificial Intelligence	73-74
37.	Effective Time Management	75-76

Course Outcomes

- ❖ Able to understand about Arduino Programming.
- ❖ Able to apply various coding techniques of Arduino Programming for different Sensors

Course Content

Introduction to Arduino Hardware Overview, Download and Install the Arduino IDE, Arduino IDE and Sketch Overview Understanding Arduino Syntax

Various Basic Industrial Sensors-IR- Analog Sensor IR Digital Sensor, Light Sensor, Basic working Technique of Sensor, Application of Sensor

Blink an LED Without using the delay Function Challenge Discussion, Using Buttons, State Change Detection and the Modulo Operator

Analog I/O and Serial Communications Strings and Text Files, Analog Input, Calibration, Object Oriented Programming

Fundamentals of Computational Device Transistor, Logic Gates, Microprocessor, Microcontroller, Difference B/W Various Computational Devices

Basic LED interfacing and coding Buzzer, LED, RGB interfacing and coding, Motor Driver L293D IC, PC keyboard controlling for LED and motor

Running LEDs Sand Glass Filling of LEDs, Sensor Interfacing, Seven Segment Display, Lab Session

RESOURCE PERSON

Dr. PUDI SEKHAR, Professor,
Department of EEE, VIIT

Venue: Electrical Simulation lab (B-04)

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

(APPROVED BY AICTE & AFFILIATED TO JNT UNIVERSITY, KAKINADA)
ISO 9001 : 2015, ISO 14001 2015, OHSAS 18001 : 2007 CERTIFIED INSTITUTION
KAPUJAGGARAJU PETA VSEZ (POST.) VISAKHAPATNAM-530049
E-mail: viewvizag@yahoo.com, website: vignanview.org

About the Institute

Vignan's Institute of Engineering for Women (VIEW) is a pioneer educational institution established in 2008 under the Chairmanship of Dr.L.Rathaiah with an objective of imparting quality education to girl students with all facilities and infrastructure. It is located in Visakhapatnam, one of the fastest growing cities of Andhra Pradesh. The campus is housed amidst industrial atmosphere conducive for vibrant Industry – Institute Interaction. The institution, with their diverse and dynamic community of about 2300 students offering various courses in Engineering stream like EEE, MECH, ECE, CSE and IT at the Under Graduate level and MBA and M. Tech at the Post Graduate level.

Student life includes participation in sports, recreational & co-curricular activities and cultural events. In short, at VIEW students will find an academic and social environment where everyone- from faculty members to peers help shape their future. VIEW has developed into a reputed Engineering Institution with ISO 9001:2015 certifications, and has been preparing for Accreditation of NAAC & NBA.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1** : To empower women engineers through innovative teaching practices.
- M2** : To encourage for higher education and research with well-equipped laboratories.
- M3** : To promote entrepreneurship through creativity and innovation.
- M4** : To promote environmental sustainability and inculcate ethical, emotional and social consciousness

About the Department

The Department of Electrical and Electronics Engineering at Vignan's Institute of Engineering for Women has been active in teaching and research since its inception 2008. The Department offers four year undergraduate program in Electrical & Electronics Engineering and two years Post graduate course in Power and Industrial Drives. Annual intake of this Department is 120 students.

The Department has state of Art Laboratories with fully equipped latest equipment and modern technical software. Faculty are encouraged to take independent initiatives with collective responsibility in all the relevant academic and R&D dimension like innovative teaching, student projects and research supervision, continuous education through organizing conferences, symposia.

Vision

To be a center of excellence for producing proficient and socially responsible women electrical engineers for industry outreach through quality education and research.

Mission

- M1** : To empower the students with skills in current trends through effective teaching- learning process for professional growth.
- M2** : To foster an eco-system for higher education and research in Electrical Engineering through constant industry interaction.
- M3** : To facilitate practical expertise in enterprise development and energy environment by promoting innovation and social consciousness.

Course Description and Objectives

Arduino senses the environment by receiving inputs from add-on devices such as sensors, and can control the world around it by adjusting lights, motors, and other actuators.

- ❖ To understand the recent application domains of Arduino in everyday life
- ❖ To design and build an actual Arduino.

Principal
Vignan's Institute of
Engineering for Women
K.J. Somaiya VSEZ (P.O.),
Visakhapatnam-49

Course Outcomes

- ❖ Develop Program Solving And Programming Capability
- ❖ Implement Object-oriented Concepts
- ❖ Implement database and GUI applications

Course Contents

Fundamentals of Python, Introduction to Python Running Python Programs, Writing Python Code, Working with Data, Data Types and Variables, Using Numeric Variables, Using String Variables

Input and Output Printing with Parameters, Getting Input from a User, String Formatting

Making Decisions, Logical Expressions Making Decisions The “if” Statement, Logical Operators, More Complex Expressions Finding and Fixing Problems, Types of Errors, Troubleshooting Tools, Using the Python Debugger

Lists and Loops introduction List Functions, Loop functions, “For” Loops with examples, While” Loops with examples

Numeric and Date Functions Dates and Times, Advanced Data and Time Management, Random Numbers, The Math Library

Working with Strings Character Data, Input Validation with “try / except”

Functions Introduction Writing and Calling Functions, Function Inputs and Outputs, Local and Global Scope, installing Python Managing Projects • Using the Python IDE , Python Managing Projects, Using the Python IDE

- M3** : To facilitate practical expertise in enterprise development and energy environment by promoting innovation and social consciousness.

Course Description and Objectives

This course is an introduction to programming and problem solving in Python. It does not assume any prior knowledge of programming. Using some motivating examples, the course quickly builds up basic concepts such as conditionals, loops, functions, lists, strings and tuples.

- ❖ To designed and provide basic knowledge of PYTHON
- ❖ To be familiarized with universal computer programming concepts like data types, containers.
- ❖ To be familiarized with general computer programming concepts like conditional execution, loops & functions

Course Outcomes

- ▶ Able to implement loops, branching, control instruction and functions in MATLAB programming environment.
- ▶ Able to program curve fitting, numerical differentiation and integration, solution linear equations in MATLAB and solve electrical engineering problems
- ▶ Able to understand implementation of ODE using ode 45 and execute Solutions of nonlinear equations and DFT in MATLAB.
- ▶ Able to simulate MATLAB Simulink examples

Course Contents

Introduction to MATLAB Programming Basics of MATLAB Programming, array operations in MATLAB, loops and execution of control, working with files: Scri and functions, plotting and programming output, examples

Numerical Methods and their applications: Curve Fitting; Straight line fit, Polynomial fit.

Linear and Nonlinear Equations Eigen values, Eigen vectors, Solution of linear algebraic equations using Gauss Elimination and LU decomposition, Solution of nonlinear equation in single variable using Gauss sicial and Newton-Raphson method

Ordinary Differential Equations: Introduction to ODE's, Euler's method, second order RungeKutta method, MATLAB ode45 algorithm in single variable and multivariables.

Transforms: Discrete Fourier Transforms,

Applications to electrical engineering problem MATLAB Simulink: Introduction to MATLAB Simulink, Simulink libraries, development of basic models in Simscape Power Systems

Course Description and Objectives

The Value Added Courses aim to provide additional learner centric graded skill oriented technical training, with the primary objective of improving the employability skills of engineering students. The main objectives of the program are:

- ◆ To know about fundamentals of MATLAB tool.
- ◆ To provide an overview to program curve fitting & solve Linear and Nonlinear Equations.
- ◆ To understand the concept and importance of Fourier transforms.
- ◆ To gain knowledge about MATLAB Simulink & solve Electrical engineering problems.

Visakhapatnam-49

Course Outcomes

Upon completion of the course, the student will be able to achieve the following outcomes:

- Able to choose the right hardware, software and protocols for the proposed application.
- Able to learn the fundamentals of this emerging technology.

Course Contents

Understanding IoT fundamentals IOT Architecture and protocols, Various Platforms for IoT, Real time Examples of IoT, Overview of IoT components and IoT Communication Technologies.

Arduino Uno Architecture Setup the IDE, Writing Arduino Software, Arduino Libraries, Basics of Embedded C programming for Arduino, Interfacing LED, push button and buzzer with Arduino.

Overview of Sensors working Analog and Digital Sensors, Interfacing of Temperature, Humidity, Motion, Light and Gas Sensor with Arduino, Interfacing of Actuators with Arduino. Interfacing of Relay Switch and Servo Motor with Arduino.

Basics of Wireless Networking Introduction to ESP8266 Wi-Fi Module, Various Wi-Fi library, Web server-introduction, installation, configuration, Posting sensor(s) data to web server.

M2M vs. IOT M2M vs. IOT, Logic Gates, Communication Protocols, Lab session Virtualization concepts and Cloud Architecture Cloud computing, benefits, Cloud services -- SaaS, PaaS, IaaS, Cloud providers & offerings, SaaS, IOT Cloud platforms.

Running LEDs Sand Glass Filling of LEDs, Sensor Interfacing, Seven Segment Display, lab session

Course Description and objectives

Arduino IoT Cloud is an application that helps makers build connected objects in a quick, easy and secure way. You can connect multiple devices to each other and allow them to exchange real-time data. You can also monitor them from anywhere using a simple user interface.

- To understand the recent application domains of IoT in everyday life
- To design and build an actual IoT system.

COURSE CONTENTS

The following topics to be Covered:

Introduction to green energy systems Various types of green energy systems, primary criteria for sustainable energy technologies, life cycle impact assessment (LCIA) using the state-of-art computational tools such as Sustainable Minds, Open LCA, and GaBi platforms, corporate sustainability and social responsibility., Importance of green energy systems, and for opting green energy systems

Introduction to pollution effects Various types of pollutions occurred in environment, Air pollution, definition, causes, problems, damages to environment, remedy methods, Water pollution, definition, causes, problems, damages to environment, remedy method, soil pollution, definition, causes, problems, damages to environment, remedy methods

Introduction to multi green energy sources What is it. How does it work, What does it mean, Types Why is it important, Examples, Can it replace fossil fuels, Can it be economically viable? Which type is most efficient

Introduction of biomass, biofuel Biomass—renewable energy from plants and animals, Photosynthesis explanation, Converting biomass to energy, various bio fuels, How much biomass is used for energy?

Introduction of hydro power, geothermal Hydroelectric Power Station, Power Estimation, Resource Assessment for Small Installation, Determining Flow, And advantages and disadvantages applications and future scope, Geothermal energy introduction and operating principle explanation, Advantages of Geothermal Energy, Enhanced Geothermal Sources (EGS)

Introduction to wind power, solar energy, Application Historical development of WT, Current Status and Future Prospects of Wind Energy, Types of Wind Turbine Generators (WT), Orientation of WT, Sizes and Applications of WT, Components of WT, Wind Power Calculations, What is solar PV, Types of solar panel, Future solar technologies, Benefits and limitations, Problems based on green energy, Real Time Applications based green energy,

Applications for Grid Operators and Utilities. Application, Energy Storage Problems, cost, various conditions.

COURSE DESCRIPTION & OBJECTIVES

This course is designed with the objective of developing the skills of the participants in tapping various sources of Renewable Energy including solar, wind, bio energy, small hydro etc.,

- ◆ Identify the essential characteristics and technical requirements of photovoltaic, wind, and low head hydroelectric energy systems.
- ◆ To study maximum power point techniques in solar pv and wind energy.

COURSE OUTCOMES

Upon completion of the course, the student will be able to achieve the following outcomes:

- Design solar photovoltaic systems
- Develop maximum power point techniques in solar PV and wind energy systems

Course Outcomes

1. Able to know about different types of EV and their working.
2. Able to Design suitable transmission and braking system for the Electric Vehicle.
3. Able to manufacture and fix it to the EV

Course Content

- Introduction, History, Components and Types of EV
- Types of Transmission systems and their components, Design of Transmission system
- Force analysis and Resistance acting on EV
- Types of Braking Systems and their components, design, Selection of suitable material for braking system.
- Components Assembly, testing and integration.
- Vehicle speed and brake power testing.

- M2: To encourage for higher education and research with well-equipped laboratories.
- M3: To promote entrepreneurship through creativity and innovation.
- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The Department of Mechanical Engineering has been established in the year 2010 with an intake of 60 students, and 120 students in the year 2013. It offers a 4-year Undergraduate programme B.Tech in Mechanical Engineering and a 2-year Postgraduate programme M.Tech. in CAD/CAM.

The main objective is to prepare the students to be successful in Mechanical Engineering to meet the industry needs, encourage lifelong skills and strengthen research.

Vision

To evolve as a centre of excellence by adopting innovative methods for teaching, learning and industry outreach services in the diversified fields of Mechanical Engineering.

Mission

- M1: Import quality education and reliable training to nurture globally competitive mechanical engineers.
- M2: Provide vital state-of-the-art research facilities to create, interpret, apply and disseminate knowledge & skills.
- M3: Develop linkage with organizations for in plant trainings for excellence in teaching, research and consultancy services.
- M4: To empower the students with technical knowledge in Mechanical Engineering for pursuing higher education for becoming entrepreneurs/employees of prominent companies and also motivating them towards research to meet the societal needs

Course Description and Objectives

The coming decade is expected to be the decade of the fully electric car. The International Energy Agency cites that by 2020 up to 20 million electric vehicles will ply the road, a number that is expected to go up to 70 million by 2025. Countries around the world are waking up to the potential of e-mobility.

The main objective of the course is to Design a suitable transmission and braking system for the Electric Vehicle, Manufacture, Assemble and attach it to the EV.

Course Outcomes

1. Knowledge on 3D Printing approach, Processes, 3D Printers.
2. Knowledge on materials issues in 3D Printing, modelling a 3D object from scratch using a 3D CAD software and on STL file format.
3. Understand the difference between industrial 3D printers, desktop 3D printers and home/hobbyists 3D printers.

Course Content

- ▶ Additive Manufacturing approach. 3D Printing, specific terms, 3D Printing advantages and limitations.
- ▶ Type of 3D Printing processes: main characteristics, materials, advantages and limitations, STL file format.
- ▶ Fused Deposition Modelling / Fused Filament Fabrication process, FDM/FFF equipment.
- ▶ Access STL files repositories such as: Thingiverse, GrabCAD, Pinshape etc, Browse the repositories and download STL file
- ▶ Access 3D Printing online services providers such as: 3D Hubs, Shapeways, Sculpteo, i.Materialise, QuickParts, Upload STL model, select material, 3D Printing process, machine, etc.

3D PRINTING TECHNOLOGY

20th Dec 2021 to 24th Dec 2021

Duration of the Course : 35 hrs

Organized
by

Department of Mechanical Engineering

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

(APPROVED BY AICTE & AFFILIATED TO JNTUK)

ISO 9001:2015, ISO 14001:2015, OHSAS 18001:2007 CERTIFIED INSTITUTION

KAPUJAGGARAJUPETA, VISAKHAPATNAM-530 049.

About the Institute

Vignan's Institute of Engineering for Women (VIEW) is a pioneer educational institution established in 2008 under the Chairmanship of Dr.L.Rathaiah with an objective of imparting quality education to girl students with all facilities and infrastructure. It is located in Visakhapatnam, one of the fastest growing cities of Andhra Pradesh. The campus is housed amidst industrial atmosphere conducive for vibrant Industry – Institute Interaction. The institution, with their diverse and dynamic community of about 2300 students offering various courses in Engineering stream like EEE, MECH, ECE, CSE and IT at the Under Graduate level and MBA and M. Tech at the Post Graduate level.

Student life includes participation in sports, recreational & co-curricular activities and cultural events. In short, at VIEW students will find an academic and social environment where everyone- from faculty members to peers help shape their future. VIEW has developed into a reputed Engineering Institution with ISO 9001:2015 certifications, and has been preparing for Accreditation of NAAC & NBA.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1: To empower women engineers through innovative teaching-learning practices.
- M2: To encourage for higher education and research with well-equipped laboratories.
- M3: To promote entrepreneurship through creativity and innovation.
- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The Department of Mechanical Engineering has been established in the year 2010 with an intake of 60 students, and 120 students in the year 2013. It offers a 4-year Undergraduate programme B.Tech in Mechanical Engineering and a 2-year Postgraduate programme M.Tech. in CAD/CAM.

The main objective is to prepare the students to be successful in Mechanical Engineering to meet the industry needs, encourage lifelong skills and strengthen research.

Vision

To evolve as a centre of excellence by adopting innovative methods for teaching, learning and industry outreach services in the diversified fields of Mechanical Engineering.

Mission

- M1: Import quality education and reliable training to nurture globally competitive mechanical engineers.
- M2: Provide vital state-of-the-art research facilities to create, interpret, apply and disseminate knowledge & skills.
- M3: Develop linkage with organizations for in plant trainings for excellence in teaching, research and consultancy services.
- M4: To empower the students with technical knowledge in Mechanical Engineering for pursuing higher education for becoming entrepreneurs/employees of prominent companies and also motivating them towards research to meet the societal needs

Course Description and Objectives

Turn Your Ideas into Objects with 3D Printing. Obtain a rich understanding of what 3D printing is and how 3D printers work and develop skills in 3D Modelling. Consider how this new technology is being used by both firms and individuals with revolutionary potential; acquire a set of tangible This Course will introduce you to the magic of 3D printing. Through hands-on capstone experience, you will acquire the knowledge and skills to turn your ideas into objects and your objects into ideas.

1. To acquire the knowledge and skills to turn your ideas into objects and your objects into ideas.
2. To bring together a unique mix of academics and industry.
3. To access STL file repositories, 3D Printing online services

Course Outcomes

The Student will be able to :

1. Understand the fundamentals of Raspberry Pi, Python programming and sensor interfacing.
2. Develop an IOT Embedded application.

Course Contents

- ❖ Introduction to IoT , Sensing, Actuation, Positioning, Basics of Networking, Communication Protocols
- ❖ Communication Protocols, Sensor Networks, Machine-to-Machine Communications, Interoperability in IoT, Introduction to Arduino Programming
- ❖ Integration of Sensors and Actuators with Arduino, Introduction to Python programming, Introduction to Raspberry Pi ,Implementation of IoT with Raspberry
- ❖ Implementation of IoT with Raspberry continuation, Introduction to SDN, SDN for IoT, SDN for IoT continuation
- ❖ Data Handling, Data Analytics, Cloud Computing, Cloud Computing Continuation, Sensor-Cloud Fog Computing, Smart Homes, Smart Grid, Connected Vehicles
- ❖ Communication between raspberry pi and IoT based clouds.
- ❖ Industrial IoT, Agriculture, Healthcare, Activity, Monitoring

About the Department

Department of Electronics and communication Engineering (ECE) at VIGNAN'S institute of engineering for women was established in the year 2008 for imparting state-of-the-art knowledge in Electronics and Communication Engineering and allied areas. Students who are eligible students are placed on campus and many of them are placed in different MNC companies every year. The department has set up laboratories with excellent infrastructure in the areas of Electronics, Communication, VLSI, and Embedded. Faculties are actively involved in R&D activities and are working on research projects funded by agencies like DST.

Vision

To emerge as a center of excellence in the field of Electronics & Communication Engineering to produce competent women engineers with ethical values.

Mission

- M1** : To train globally employable engineers through effective teaching – learning process, industry ready skills and value-added courses.
- M2** : To promote higher education and research initiatives through continuous industry interaction and special skill development programs.
- M3** : To promote ethical values, personality and leadership skills through extra and co-curricular activities.

Course Description and Objectives

Raspberry Pi is a small, affordable single-board computer that you will use to design and develop fun and practical IoT devices while learning programming and computer hardware. In addition, you will learn how to set up up the Raspberry Pi environment, get a Linux operating system running, and write and execute some basic Python code on the Raspberry Pi.

1. This course elucidates concepts related to Internet of Things.
2. The students will get handson experience in working with Raspberry Pi and exploring IoT.

Course Outcomes

The Students will be able to :

1. Make use of the Python Programming language to provide solution to Engineering Problems.
2. Apply the syntax and advanced concept to code.

Course Contents

- ❖ Motivation for Computing, Variables and Expressions Design your own calculator, Welcome to Programming, Lists, Tuples and Conditionals
- ❖ Abstraction Everywhere : Apps in your phone, Counting Candies : Crowd to the rescue, Birthday Paradox : Find your twin, Google Translate : Speak in any Language
- ❖ Monte Hall : 3 doors and a twist, Sorting : Arrange the books, Searching : Find in seconds, Substitution Cipher : What's the secret, Sentiment Analysis : Analyse your Facebook data
- ❖ 20 questions game : I can read your mind, Permutations : Jumbled Words, Spot the similarities : Dobble game
- ❖ Count the words : Hundreds, Thousands or Millions, Rock, Paper and Scissor : Cheating not allowed, Lie detector : No lies, only TRUTH.

- M2** : To promote higher education and research initiatives through continuous industry interaction and special skill development programs.
- M3** : To promote ethical values, personality and leadership skills through extra and co-curricular activities.

Course Description and Objectives

The course brings programming to your desk with anecdotes, analogies and illustrious examples. Turning abstractions to insights and engineering to art, the course focuses primarily to inspire the learner's mind to think logically and arrive at a solution programmatically. As part of the course, you will be learning how to practice and culture the art of programming with Python as a language.

1. The students will be learning how to practice and culture the art of programming with Python as a language.
2. we introduce some of the current advances in computing .

Course Outcomes

The Students will be able to :

1. Make use of MATLAB syntax for specific applications.
2. Write Programs to solve complex Engineering Problems.

Course Contents

- ❖ Introduction to MATLAB, Basic Features Starting MATLAB, Using MATLAB as a calculator, Quitting MATLAB, Creating MATLAB variables, Overwriting variable, Error messages, Making corrections.
- ❖ Mathematical Functions, Basic Plotting, Creating simple plots, Adding titles, axis labels, and annotations, Multiple data sets in one plot, Specifying line styles and colors, Introduction to programming in MATLAB, M-File.
- ❖ Control flow and operators, Relational and logical operators , The “for...end” loop, The “while...end” loop, Other flow structures, Operator precedence, Saving output to a file
- ❖ Debugging M Files, Debugging Process, Correcting an M File Examining values, Correcting and ending debugging, Ending debugging, Correcting an M-file.
- ❖ Calling Functions, Transfer Functions, Anonymous ,inline Functions Anonymous Functions in Matlab, inline functions in Matlab, Bessel Functions in Matlab, Mean Functions in Matlab, Find Function, Filter Function, IIR Filter
- ❖ Kalman, Low Pass, Band Pass Filter , Delta Function

- M3** : To promote ethical values, personality and leadership skills through extra and co-curricular activities.

Course Description and Objectives

This course (Introduction to MATLAB) will take those new/beginners in MATLAB through very important basic topics in MATLAB to allow them to get up to speed very quickly (less than 3 hours). The course will explain how to perform certain tasks in MATLAB showing you (line by line) how to write the code.

1. To know about fundamentals of MATLAB tool .
2. To provide an overview to program curve fitting & solve Linear and Nonlinear Equations.

Course Outcomes

The Students will be able to :

1. Use Python Modules to code for real and Practical tasks.
2. Apply Python Programs to GUI based applications.

Course Contents

- ❖ Invoking the interpreter, using the Python as a Calculator, Getting Familiar with Visual Studio Code More Data Types, Variables, Note on Naming Variables, Mathematical Operators, Assignment Operators, Converting Data Types, Comments, Understanding and Solving Errors,
- ❖ Range Functions, Break and Continue Statements, Pass Statements
- ❖ Looping Techniques, Logical operators ,Error Handling, String Control, File Handling Defining Functions , More on Defining Functions ,Coding Style , More on Lists , The del statement , Tuples and Sequences .
- ❖ More on Modules, Raising Exceptions, User Defined Exceptions
- ❖ Python Scopes and Name spaces,A First Look at Class ,Private Variables Arrays, Loops, Functions, Error Handling, Strings Control, File Handling, Object Oriented Programming Basics
- ❖ Making quiz game,Making a Guess the Number Game,Making ATM

- M2** : To promote higher education and research initiatives through continuous industry interaction and special skill development programs.
- M3** : To promote ethical values, personality and leadership skills through extra and co-curricular activities.

Course Description and Objectives

Introduction to programming basics (what it is and how it works), binary computation, problem-solving methods and algorithm development. Includes procedural and data abstractions, program design, debugging, testing, and documentation. Covers data types, control structures, functions, parameter passing, library functions, arrays, inheritance and object oriented design. Laboratory exercises in Python.

1. To Learn core Python scripting elements such as variables and flow control structures.
2. To acquire Object Oriented Skills in Python

Course Outcomes

The Students will be able to :

1. Develop a single and multilayer PCB board.
2. Utilize the designed PCB board for hardware connections.

Course Contents

- ❖ Introduction to PCB, Types of PCB, Methods of Manufacturing Introduction to Proteus, Steps in Proteus, Schematic Design, Annotation, Electric Rule Check, Net List Generation, BOM Generation, CVPCB - Changing Components to Module
- ❖ Foot Print Description, Selecting and Assigning Foot Print, Designing the Tracks Gerber File Generation, Component Creation Adding components to Library, Footprint Creation
- ❖ Etching Process and Drilling Process, Soldering Techniques process Other manufacturing processes, & Industrial Manufacturing Videos Circuit Explanation, Testing the Board
- ❖ Proteus Software tool Explanation, Schematics Creation Making print on copper board, Etching process., Soldering and testing components on board.
- ❖ Layout Preparation, Soldering and Testing Components on PCB
- ❖ Hands on session in both hardware & Software

Course Description and Objectives

To provide hand-on experience in PCB Circuit design using software and to familiarize with PCB Fabrication process. To provide hands on experience in assembly and Testing of electronics circuit.

1. To familiarize the electronic components and basic electronic instruments.
2. To make familiar with PCB design and various processes involved.

Course Outcomes

Students will be able to :

1. Understand about basic concepts of circuit emulators
2. Analyze Life cycle of embedded design and its testing

Course Contents

- ▶ Introduction to Embedded Systems and Computer Systems Terminology. Modular approach to Embedded System Design, Microcontroller Based Embedded System Design.
- ▶ Introduction to MSP430 Microcontroller, MSP430 CPU Architecture. Programming Methods for MSP430.
- ▶ Introduction to Lunchbox Platform. Advanced Physical Interfacing. Programming the MSP430, Installing and using Code Composer Studio (CCS)
- ▶ Introduction to Embedded C, Interfacing LEDs and Switches with MSP430 using Digital Input and Output.
- ▶ MSP 430 Clock and Reset System, MSP 430 Clock sources and Distributions, types of Reset sources, Handling interrupts in MSP 430

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1** : To empower women engineers through innovative learning practices.
- M2** : To encourage for higher education and research in well equipped laboratories.
- M3** : To promote entrepreneurship through creativity and innovation.
- M4** : To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

Department of Electronics and communication Engineering (ECE) at WIGNAN'S institute of engineering for women was established in the year 2008 for imparting state-of-the-art knowledge in Electronics and Communication Engineering and allied areas. Students who are eligible students are placed on campus and many of them are placed in different MNC companies every year. The department has set up laboratories with excellent infrastructure in the areas of Electronics, Communication, VLSI, and Embedded. Faculties are actively involved in R&D activities and are working on research projects funded by agencies like DST.

Vision

To emerge as a center of excellence in the field of Electronics & Communication Engineering to produce competent women engineers with ethical values.

Mission

- M1** : To train globally employable engineers through effective teaching – learning process, industry ready skills and value-added courses.
- M2** : To promote higher education and research initiatives through continuous industry interaction and special skill development programs.
- M3** : To promote ethical values, personality and leadership skills through extra and co-curricular activities.

Course Description and Objectives

To introduce the Building Blocks of Embedded System , to Educate in Various Embedded Development Strategies, to Introduce Bus Cotmmunication in processors, Input/output interfacing

1. To enable the students to understand embedded-system programming and apply that knowledge to design and develop embedded solutions
2. Identify hardware and software components to build an embedded system.

Course Outcomes

Student will be able to :

1. Understand the importance of peripheral devices for data communication.
2. Develop a Micro controller based product for Engineering Problems.

Course Contents

- Introduction to embedded systems hardware and software components, system on chip-challenges in embedded computing system design
- PIC microcontrollers: History and features CCS C Compiler and PIC18F Development System, PIC Architecture & Programming
- PIC I/O Port Programming, PIC Programming in C, PIC18 Hardware Connection and ROM loaders
- LCD and Keypad Interface, External EEPROM USB and HID Class
- Capture Mode Programming and Pulse Width Measurement Digital Oscilloscope, spectral Analyzer, and multimeter
- C# RS232 Interface Programming, C# GUI Plot Program, Digital Oscilloscope, Spectral Analyzer

Venue : B-35

ABOUT THE COLLEGE:

Vignan's Institute of Engineering for Women (VIEW) is a pioneer educational institution established in 2008 under the Chairmanship of Dr.L.Rathaiah with an objective of imparting quality education to girl students with all facilities and infrastructure. It is located in Visakhapatnam, one of the fastest growing cities of Andhra Pradesh. The campus is housed amidst industrial atmosphere conducive for vibrant Industry – Institute Interaction. The institution, with their diverse and dynamic community of about 2300 students offering various courses in Engineering stream like EEE, MECH, ECE, CSE and IT at the Under Graduate level and MBA and M. Tech at the Post Graduate level.

Student life includes participation in sports, recreational & co-curricular activities and cultural events. In short, at VIEW students will find an academic and social environment where everyone- from faculty members to peers help shape their future. VIEW has developed into a reputed Engineering Institution with ISO 9001:2015 certifications. The institute has been Accredited by NBA for EEE, ECE, CSE, IT Programmes. The insitute had been preparing for accretidition of NAAC.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1** : To empower women engineers through innovative educational practices.
- M2** : To encourage for higher education and research in state-of-the-art laboratories.
- M3** : To promote entrepreneurship through creativity and innovation.
- M4** : To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

- M2** : To promote higher education and research initiatives through continuous industry interaction and special skill development programs.
- M3** : To promote ethical values, personality and leadership skills through extra and co-curricular activities.

Course Description and Objectives

This design is used in a medical application and has many high resolution analogue inputs. Careful PCB layout was required to separate these high impedance, low noise circuits from the high current output drivers.

1. To enable the students to design and interfacing of microcontroller-based embedded systems
2. High-level languages are used to interface the microcontrollers to various applications

Course Outcomes

The Students will be able to :

1. Learn the principles and objectives of basic signal processing methods fundamental to all radars.
2. Understand interference suppression methods for noise, clutter, and jamming

Course Contents

- ◆ Fundamentals of radar systems, Propagating EM waves in space and time, Doppler shift, Range equation, system structure, Signal Models, Radar cross section of targets and clutter, multipath
- ◆ Statistical signal models, Swerling models, advanced (compound) statistical signal models for clutter, convolution models in range and angle
- ◆ Basic waveforms: simple pulse, LFM, coherent pulse train, Coded waveforms: frequency, phase (biphase, Costas), MCW, step-freq, Optimum waveforms for time delay, velocity, acceleration measurements
- ◆ Sampling complex band pass signals, Sampling rates in range, angle, Doppler, space, I/Q imbalance and correction techniques, Matched filter (vector formulation)
- ◆ MTI as approximation to matched filter for unknown target velocity, DFT/pulse Doppler approx to matched filter for known target velocity, Optimal Detection

About the Department

The Department of Computer Science and Engineering has been established in the year 2008 with an intake of 90 students, and 180 students in the year 2013. It offers a 4-year Undergraduate programme B.Tech. in Computer Science and Engineering and a 2-year Postgraduate programme M.Tech. in Computer Science and Engineering. The main objective is to prepare the students to be successful in Computer Science Engineering to meet the industry needs, encourage lifelong skills and strengthen research.

Vision

To evolve into a centre of excellence and to empower women in emerging areas of Computer Science and Engineering.

Mission

M1: To train students to analyze, design, develop and test software applications.

M2: To impart technical expertise in sustaining the needs of the IT industry.

M3: To foster research activities and entrepreneurial skills in emerging technologies.

M4: To inculcate lifelong learning skills and social consciousness in line with technological advancement.

Course Description and Objectives

Competitive Programming is a mental sport which enables to code a given problem under provided constraints. The course helps to construct algorithms involving Dynamic Programming, Bit masking, Greedy Algorithms and Divide & Conquer along with the essentials of advanced competitive programming topics.

1. To improve logical and analytical skills.

2. To improve programming patterns like recursion.

Course Outcomes

At the end of the course, the student will have the ability to:

- Identify various privacy issues and threats in online platform.
- Use the internet or social media platform in an effective manner.
- Understand the threats and defend privacy through real-time and scalable systems.

Course Contents

1. Introduction; Various Privacy breaches, and its effects; Why Online privacy has become an important topic?; Privacy cases / litigations, and outcome.
2. Definition & forms of Privacy; Difference between data security & data privacy; Trade-off between privacy, utility and freedom of speech; Contextual integrity theory and applications.
3. Privacy Attitudes & Awareness, Social Media Privacy.
4. Data anonymity: K-anonymity, L-diversity, T-closeness, Differential privacy.
5. Image & Location privacy; Ethics about studying online privacy: Institutional Review Board / Ethics Committee; Conducting {User, Lab, and Online} Studies; Privacy from 3rd party trackers & advertisers.
6. User behaviour & Usable privacy; Privacy in National projects like Aadhaar, NATGRID; Differential privacy in US census, Apple; PDP Bill / Srikrishna commission report / GDPR: implications.
7. Privacy policies: Length, readability, legality, cost of reading privacy policies; Nutrition labels of Privacy policies: How to make the policies simple and user friendly

Course Description and Objectives

With increase in the usage of the Internet, there has been an exponential increase in the use of online platforms, including social media (Facebook, Twitter, Koo, Tinder), e-commerce (Amazon, Flipkart), gaming (Roblox), video streaming (Netflix, Amazon Prime, Twitch), and messaging (WhatsApp, Signal, Telegram) services.

- Implement security design principles.
- Explain the core concepts of access control.
- Implement reference monitors.
- Apply security policies that are commonly used in modern operating systems

Course Outcomes

At the end of the course, the student will have the ability to:

- Write simple GUI applications, use built-in widgets and components.
- Work with the database to store data locally.
- Able to develop a prototype which operates with the Parse web service

Course Contents

- ▶ Introduction to Internet
- ▶ Building your webapp
- ▶ Databases
- ▶ Introduction to Client-side Javascript
- ▶ Introduction to security for webapps
- ▶ Mobile Application Development
- ▶ Building a Blog App

Course Description and Objectives

Nowadays, the gadgets are rolling the world. Many people cannot imagine even one day without their favourite mobile device. We use them for everything: find information, stay connected with our friends and families, find the way around, decide what to do, and many other things. But very often we come to the point when we would like to have an application for particular situation or for certain need, but there is no such one

- To understand the basics of the Internet, building a web application, databases.
- To understand the performance and security and building a mobile application

Course Outcomes

At the end of the course, the student will have the ability to:

- Choose the right hardware, software and protocols for the proposed application.
- Learn the fundamentals of this emerging technology.

Course Content

- Introduction to IoT – Definition, Applications, Challenges – Unique ID, Power, Security, Location, Addressing the Power challenge – RFID.
- Energy harvesting, Battery based systems, Power management systems, System design for low power – LDO.
- DC-DC converters, low power software, Sensors and actuators – Temperature sensor, Air quality, Solenoid valves.
- Power management algorithms, IoT protocols – MQTT, COAP.
- Web sockets with associated applications, Low power wireless technologies – BLE, IEEE 802.15.4e.
- Low power wireless technologies –Wi-Fi.

- M3: To foster research activities and entrepreneurial skills in emerging technologies.
- M4: To inculcate lifelong learning skills and social consciousness in line with technological advancement.

Course Description and Objectives

This course will describe the market around the Internet of Things (IoT), the technology used to build these kinds of devices, how they communicate, how they store data, and the kinds of distributed systems needed to support them.

- Understand the definition and significance of the Internet of Things.
- Discuss the architecture, operation, and business benefits of an IoT solution.
- Examine the potential business opportunities that IoT can uncover.
- Explore the relationship between IoT, cloud computing, and big data.

Course Outcomes

At the end of the course, the student will have the ability to :

- Able to understand cyber security landscapes.
- Able to identify software vulnerabilities and security solutions to reduce the risk of exploitation.

Course Content

- Introduction to Cyber Space: History of Internet, Cyber Crime, Information Security and Computer Ethics.
- Guidelines to choose Best Browser according to the requirement and email security.
- Guidelines for secure password and wi-fi security, Two-steps authentication, Password Manager.
- Guidelines for social media and basic Windows security ,Tips and best practices for safer Social Networking ,Basic Security for Windows, User Account Password
- Smartphone security guidelines, Introduction to mobilephones , SmartphoneSecurity,Android Security, IOS Security.
- Cyber Security :Counter Initiatives in India,. Exercise,Incident Handling and Assurance.
- Online Banking Security, Mobile Banking Security, Security of Debit and Credit Card ,UPI Security

- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The Department of Computer Science and Engineering has been established in the year 2008 with an intake of 90 students, and 180 students in the year 2013. It offers a 4-year Undergraduate programme B.Tech in Computer Science and Engineering and a 2-year Postgraduate programme M.Tech. in Computer Science and Engineering.

The main objective is to prepare the students to be successful in Computer Science Engineer to meet the industry needs, encourage lifelong skills and strengthen research.

Vision

To evolve into a centre of excellence and to empower women in emerging areas of Computer Science and Engineering.

Mission

- M1: To train students to analyze, design, develop and test software applications.
- M2: To impart technical expertise in sustaining the needs of the IT industry.
- M3: To foster research activities and entrepreneurial skills in emerging technologies.
- M4: To inculcate lifelong learning skills and social consciousness in line with technological advancement.

Course Description and Objectives

The course on Cyber Security is important in this digital era as most of our operations are online. Learning secure operations and the best practices are essential to protect each one of us from becoming the victims of cybercrimes. Fundamental knowledge is very much required to understand the current status of cyber world. It is imperative to safe-guard the individual, organization and the government from the dangers of cyber threats and attacks.

1. To enhance awareness about cyber security challenges and cyber ethics.
2. To become responsible cyber citizens and participate safely and securely in rapidly evolving information-age society.

Course Outcomes

At the end of the course, the student will have the ability to:

- Apply image formation concepts in various applications.
- Understand Image processing, Image Formation and Image Descriptors.

Course Contents

1. Introduction to Computer Vision and Basic Concepts of Image Formation, Introduction and Goals of Computer Vision and Image Processing.
2. Fundamental Concepts of Image Formation, Radiometry, Geometric Transformations, Geometric Camera Models.
3. Image Processing Concepts, Image Transforms, Image Enhancement.
4. Image Filtering, Color Image Processing, Image Segmentation, Image Descriptors and Features.
5. Texture Descriptors, Colour Features, Edges/Boundaries, Applications of Computer Vision. Artificial Neural Network for Pattern Classification, Convolutional Neural Networks, Autoencoder
6. Applications of Computer Vision, Gesture Recognition, Motion Estimation and Object Tracking.
7. Practice session & assessment.

Fundamentals and applications in Computer Vision

11th March 2022 to 19th March 2022

Duration of the Course : 42 hrs

Organized
by

Department of Computer Science and Engineering

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

Accredited by NBA For UG Programmes of EEE, ECE, CSE & IT
KAPUJAGGARAJUPETA, VISAKHAPATNAM-530 049.

About the Institute

Vignan's Institute of Engineering for Women (VIEW) is a pioneer educational institution established in 2008 under the Chairmanship of Dr.L.Rathaiah with an objective of imparting quality education to girl students with all facilities and infrastructure. It is located in Visakhapatnam, one of the fastest growing cities of Andhra Pradesh. The campus is housed amidst industrial atmosphere conducive for vibrant Industry – Institute Interaction. The institution, with their diverse and dynamic community of about 2300 students offering various courses in Engineering stream like EEE, MECH, ECE, CSE and IT at the Under Graduate level and MBA and M. Tech at the Post Graduate level.

Student life includes participation in sports, recreational & co-curricular activities and cultural events. In short, at VIEW students will find an academic and social environment where everyone- from faculty members to peers help shape their future. VIEW has developed into a reputed Engineering Institution with ISO 9001:2015 certifications, and has been preparing for Accreditation of NAAC.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1: To empower women engineers through innovative teaching-learning practices.
- M2: To encourage for higher education and research with well-equipped laboratories.
- M3: To promote entrepreneurship through creativity and innovation.
- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The Department of Computer Science and Engineering has been established in the year 2008 with an intake of 90 students, and 180 students in the year 2013. It offers a 4-year Undergraduate programme B.Tech in Computer Science and Engineering and a 2-year Postgraduate programme M.Tech. in Computer Science and Engineering.

The main objective is to prepare the students to be successful in Computer Science Engineer to meet the industry needs, encourage lifelong skills and strengthen research.

Vision

To evolve into a centre of excellence and to empower women in emerging areas of Computer Science and Engineering.

Mission

- M1: To train students to analyze, design, develop and test software applications.
- M2: To impart technical expertise in sustaining the needs of the IT industry.
- M3: To foster research activities and entrepreneurial skills in emerging technologies.
- M4: To inculcate lifelong learning skills and social consciousness in line with technological advancement.

Course Description and Objectives

The intent of this course is to familiarize the students to explain the fundamental concepts/issues of Computer Vision and major approaches that address them. This course provides an introduction to computer vision including image acquisition and image formation models, radiometric models of image formation, image formation in the camera, image processing concepts, concept of feature extraction and selection for pattern classification/recognition, and advanced concepts like motion estimation and tracking, image classification, scene understanding, object classification and tracking, image fusion, and image registration, etc.

- To study about image processing concepts.
- To learn about the fundamental concepts those are involved in image formations and various applications of Computer vision.

Course Outcomes

At the end of the course, the student will have the ability to:

- Demonstrate proficiency with statistical analysis of data
- Develop the ability to build and assess data-based models.

Course Content

1. Data Analytics Lifecycle Overview, Key Roles for a Successful Analytics Project, Background and Overview of Data Analytics Lifecycle.
2. Data Preparation, Preparing the Analytic Sandbox, Performing ETL, Learning About the Data, Data Conditioning, Survey and Visualize, Common Tools for the Data Preparation Phase.
3. Case Study: Global Innovation Network and Analysis (GINA), Discovery, Data Preparation, Model Planning, Operationalize.
4. Risk and Loss in Unsupervised Learning, Expectation-Maximization (EM) Algorithm, Clustering via Mixture Models.
5. Clustering via Vector Quantization, K-Means, Clustering via Continuous Multiextremal Optimization.
6. Principal Component Analysis (PCA), Motivation: Principal Axes of an Ellipsoid, PCA and Singular Value Decomposition (SVD).

Course Description and Objectives

Data Science is a unique multidisciplinary confluence of Computer Science, Computational Mathematics, Statistics and Management. Data engineering involves data collection methods, designing enterprise data storage and retrieval. The core part of Data Science Engineering is data analytics, visualization, predictive modeling and analytics for data-driven decision making.

1. To understand the recent application domains of Data Science in everyday life.
2. To design and build a Real time Data Science Models.

Course Outcomes

At the end of the course, the student will have the ability to:

- Identify various concepts of mobile programming that make it unique from programming for other platforms.
- Develop the ability to build and assess data-based models.

Course Contents

1. Why Mobile Apps?, App Design Issues and Considerations
2. IDEs and Editors, Using Eclipse for Android Development and Android Navigation and Interface Design
3. Lists in Android: Navigation and Information Display, Maps and Location in Android.
4. Type Script, Basic Types Functions Interfaces and Classes Decorators Angular.
5. Web Components, Why Do We Need Web Components? Custom Elements, Shadow DOM, HTML Templates, HTML ports.
6. List Component, Simple List, Header and Separ Grouping of Items Icons, Avatars, Thumbnails.

- M4: To inculcate lifelong learning skills and social consciousness in line with technological advancement.

Course Description and Objectives

Android will be used as a basis for teaching programming techniques and design patterns related to the development of standalone applications and mobile portals to enterprise and m-commerce systems. Students will work at all stages of the software development life-cycle from inception through to implementation and testing. In doing so, students will be required to consider the impact of user characteristics, device capabilities, networking infrastructure and deployment environment, in order to develop software capable of meeting the requirements of stakeholders.

1. To facilitate students to understand android SDK 2.
2. To help students to gain a basic understanding of Android Application development.

Course Outcomes

At the end of the course, the student will have the ability to:

- Create charts and graphs.
- Create reports and dashboards that are collections of visuals.

Course Contents

- Power Pivot and the Power BI Family: Making Sense of the Various Versions, Loading Data Into Power Pivot, Intro to Calculated Columns, Introduction to Power BI.
- IF(), SWITCH(), BLANK() and Other Conditional Fun SUMX() and Other X ("Iterator") Functions.
- "Complicated" Relationships, Row and Filter Context Demystified
- CALCULATE and FILTER – More Nuances.
- The tool chest called Power BI process.
- Power BI Parts and Pieces.

Course Description and Objectives

Power BI is a Data Visualization and Business Intelligence tool that converts data from different data sources to interactive dashboards and BI reports. Power BI suite provides multiple software, connector, and services - Power BI desktop, Power BI service based on SaaS, and mobile Power BI apps available for different platforms. These set of services are used by business users to consume data and build BI reports.

- ▶ Microsoft Power BI is used to find insights within an organization's data.
- ▶ Power BI can help connect disparate data sets.
- ▶ Transform and clean the data into a data model and create charts or graphs to provide visuals of the data.

Course Outcomes

- ▶ Learn various tools of digital 3-D animation
- ▶ Understand production pipeline to create 2-D animation
- ▶ Analyse special effects in animation to bring interest and awe in the scenes and backgrounds.

Course Content

- ▶ 3D Animation Overview
- ▶ Working in 3D Animation Preproduction, Production, Postproduction
- ▶ Understanding Digital Imaging and Digital Video
- ▶ Using Principles of Fine Art and Traditional Animation
- ▶ Understanding Modeling and Texturing
- ▶ Rigging and Animation
- ▶ Understanding Visual Effects and Lighting

- M2: To encourage for higher education and research with well-equipped laboratories.
- M3: To promote entrepreneurship through creativity and innovation.
- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

Department of Information Technology (IT) at VIGNAN'S institute of engineering for women was established in the year 2008 for imparting state-of-the-art knowledge in Information Technology and allied areas. The programme is focused and designed by JNTUK to empower women students to acquire overall skills and in depth knowledge in its specialization to make significant contributions to the ever changing needs and demands of the society and IT industry. The department has state-of-the-art laboratories and classrooms equipped with ICT-enabled learning resources to facilitate and enhance students on latest technologies and skills.

Vision

To evolve into a center of excellence and produce competent women IT professionals with ethics and values towards research, higher education and entrepreneurship

Mission

- M1: To empower women engineers with latest skills and technical competency by adopting best practices.
- M2: To inspire students towards self-learning, higher education and research with ethics.
- M3: To encourage innovation, leadership, communication skills, and motivate them towards entrepreneurs.

Course Description and Objectives

This Course will enable students to learn various aspects of animation using a variety of 3-D software and to implement advance principles of traditional animation in Adobe animate to create high quality animation for production.

- Define 3D animation
- Compare and contrast two and three-dimensional animation
- Explain the history of three-dimensional animation
- Describe the process of creating three-dimensional animation

Course Outcomes

- ▶ Demonstrate and understand the basic concepts of web programming.
- ▶ Write well-structured, easily maintained, standards-compliant, web pages using HTML and CSS code.
- ▶ Apply techniques of form validation using Java Script.

Course Content

- ▶ Introduction to HTML and CSS
- ▶ JavaScript and Advanced Object concepts
- ▶ Introduction to PHP , Arrays and Functions
- ▶ Introduction to Python and OOPS concepts
- ▶ PERL , Hashs and File Handling
- ▶ Fundamentals of Angular JS
- ▶ Fundamentals of Ruby
- ▶ Fundamentals of NODE JS

- M3: To encourage innovation, leadership, communication skills, and motivate them towards entrepreneurs.

Course Description and Objectives

This Course will enable students to learn various aspects of Web Development with a combination of both frontend and backend languages that are used by developers and programmers to build a well-functioning website or web application.

- Write backend code in PHP language and Writing optimized front end code in HTML and JavaScript
- Understand, create and debug database related queries and Create test code to validate the applications against client requirement.

Course Outcomes

1. Understanding the modern interpretation of the national culture and impact of culture to the major management process.
2. Developing skills in communication, team-building, motivation leadership and negotiation in multicultural environment.

Course Content

- ▶ Evaluation approaches and methodologies aimed at arts/culture/heritage.
- ▶ New forms of arts/culture/heritage and its advertising, marketing and promotion
- ▶ Philosophical approaches to arts/culture/heritage. tourism/leisure and arts/culture interactions.
- ▶ Culture management approaches & Strategies. Importance of having a strong organizational culture.
- ▶ Cultural negotiation and process. Successful implementation of culture change.

- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The MBA department has been established in the year 2009 with intake of 120 students. It offers two years' post- graduation programme in Management Administration. The teaching staff are fulfill the norms of JNTU university, Kakinada and AICTE. The main objective is to prepare our students to be successful manager in Global and competitive environment..

The MBA department is keen to guide students through interactive sessions and group discussions so as to make them more confident and innovative which is the need of this global business era. Vignan's Institute of engineering for Women, is one of the premier institutions, like a prism reflecting them the manifold shades of learning and co curricular activities. The Department strives hard towards the goal of providing innovative and quality education with high standards to achieve academic excellence.

Vision

To be a centre of excellence in Management Education.

Mission

To strive for excellence in imparting managerial knowledge and entrepreneurial skills through global pedagogy; to inculcate leadership qualities for the needs of the industry; to impart social consciousness and ethical values

Course Description and Objectives

Designed to meet the complex needs of today's cultural managers and professionals. Helps to apply creative leadership and ethical principles in managing excellence, cultural heritage, audience diversity and financial sustainability, at local and global levels.

1. Studying a fundamentally new approach to company's management, taking into consideration cultural differences.
2. To impart knowledge regarding Culture management.

Course Outcomes

1. Able to process the payroll for an employee.
2. It helps to manages the gross and net pay, which also includes the payments and deductions calculated.
3. Able to enable a more engaged and productive workforce.

Course Content

- Introduction to SAP R/3
- Financial Accounting Basic Settings
- General Ledger Accounting
- Accounts Payable
- Accounts receivable
- Asset Accounting
- Reports
- Basic settings for controlling
- Cost Center Accounting
- Profit Center Accounting
- BRS
- Integration

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

(Approved by AICTE & Affiliated to JNTUK)

ISO 9001 2015 ISO 14001 2015 OHSAS 18001 2007 Certified Institution
KAPUJAGGARAJUPETA, VISAKHAPATNAM-530 049.

About the Institute

Vignan's Institute of Engineering for Women (VIEW) is a pioneer educational institution established in 2008 under the Chairmanship of Dr.L.Rathaiah with an objective of imparting quality education to girl students with all facilities and infrastructure. It is located in Visakhapatnam, one of the fastest growing cities of Andhra Pradesh. The campus is housed amidst industrial atmosphere conducive for vibrant Industry – Institute Interaction. The institution, with their diverse and dynamic community of about 2300 students offering various courses in Engineering stream like EEE, MECH, ECE, CSE and IT at the Under Graduate level and MBA and M. Tech at the Post Graduate level.

Student life includes participation in sports, recreational & co-curricular activities and cultural events. In short, at VIEW students will find an academic and social environment where everyone- from faculty members to peers help shape their future. VIEW has developed into a reputed Engineering Institution with ISO 9001:2015 certifications, and has been preparing for Accreditation of NAAC.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1: To empower women engineers through innovative teaching-learning practices.
- M2: To encourage for higher education and research with well-equipped laboratories.
- M3: To promote entrepreneurship through creativity and innovation.
- M4: To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

Accredited by NBA For UG Programmes of EEE, ECE, CSE & IT

KAPUJAGGARAJUPETA, VISAKHAPATNAM-530 049.

About the Institute

Vignan's Institute of Engineering For Women, established in the year 2008, has been in the forefront of technical education services especially for women engineering aspirants. It is offering Graduate and Post Graduate courses in Engineering in the streams of EEE, ECE, IT, CSE & ME. MBA is too offered. Over the years the institution has registered impressive growth rate in academics and R&D. Since the beginning the students of the college have made it a regular habit to top the performance charts of JNTUK examinations. Through several extension activities the institution is reaching out to the society nearby. The institution is having sophisticated laboratories, well ventilated class rooms, play grounds and hygienically maintained canteen facilities. Located in a lush green ambience the campus offers serene environment for studies.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1** : To empower women engineers through innovative teaching-learning practices.
- M2** : To encourage for higher education and research with well-equipped laboratories.
- M3** : To promote entrepreneurship through creativity and innovation.
- M4** : To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The Department of Basic Sciences & Humanities, established in the year 2008, has been the backbone of the engineering college by offering courses in Mathematics, Physics, Chemistry, Statistics, English and Environmental Science to the first year as well as second year students depending curriculum generated by the affiliating University. Apart from delivering the curricular content, the Department takes active role in imparting the necessary life skills and technical skills required for a budding engineer by including some short term courses as well. This will expand the scope and horizon of the young students. The department boasts of well qualified and experienced faculty and efficient infrastructure. The students in the first year have topped the University exams consecutively. Students regularly participate in the social service activities and co-curricular activities.

About the Course

Stress is a part of daily living and each individual responds to stress differently. Thus there's no "one size fits all" solution to managing stress. Stress management techniques can teach an individual healthier ways to cope with stress, help reduce its harmful effects, and prevent stress from spiralling out of control again in the future. The goal of stress management is not to eliminate all stress. This course aims to teach the student how to limit the harmful effects of stress while maintaining life's quality and vitality.

Objectives :

After studying this lesson, students will be able to:

- Define key terms related to stress, the stress response, and stress management.
- Explain the physiological and psychological changes that occur in response to stress.
- Identify the positive and negative effects of stress.
- Identify various stress management techniques and the benefits of each technique.

About the Course

The 21st century career development planning has become very individual-centric, so organisations need to be specific in their recruitment process to ensure they balance the needs of the organisation properly along with the individual needs.

In this tutorial, we will discuss in detail about the benefits of career development planning and how an organisation can help its employees to develop different strategies for their betterment.

Objectives

By the end of this course, students should be able to;

- Demonstrate a clearer understanding of the career exploration process and how their own skills and interests match up to a chosen major/career path.
- Learn how to write professional documents (resume, cover letter, thank you letter) to use for jobs, internships and post graduate program applications.
- Become part of a community within the Mentoring Network that provides insights and connections to help them make their career dreams a reality.

About the Course

HTML and CSS go hand in hand for developing flexible, attractively and user friendly websites. HTML (Hyper Text Markup Language) is used to show content on the page where as CSS is used for presenting the page. HTML describes the structure of a Website semantically along with presentation cues, making it a mark-up language, rather than a programming language. HTML allows images and objects to be embedded and can be used to create interactive forms.

Objectives

By the end of this course, students should be able to;

- Define the principle of Web page design, basics in web design.
- Visualize the basic concept of HTML.
- Recognize the elements of HTML.
- Introduce basics concept of CSS.

Course Out comes

- Be able to use the HTML programming languages
- Runs the page has designed using HTML codes

- Explain terms like Machine Learning, Deep Learning and Neural Networks
- Describe several issues and ethical concerns surrounding AI
- Prepare for taking advances into a variety of advanced courses in sub fields of AI

Course Content :

- Introduction: Philosophy of AI- Definitions - AI Concepts, Terminology, and Application Areas: Modeling a Problem as Search Problem, Uninformed Search
- Heuristic Search, Domain Relaxations Local Search, Genetic Algorithms Adversarial Search
- Constraint Satisfaction Propositional Logic & Satisfiability Uncertainty in AI, Bayesian Networks
- Bayesian Networks Learning & Inference, Decision Theory Markov Decision Processes Reinforcement Learning
- Introduction to Deep Learning & Deep RL Applications of AI: Image processing and Computer Vision Robotic and Robot motion planning ; Natural Language Processing and information retrieval
- AI: Issues, Concerns and Ethical Considerations The Future with AI, and AI in Action

Venue : B-44, Class Room, VIEW.

Resource Person :

Mrs. G. Pavani Latha,

Asst. Professor, VIEW

Course Co-ordinator :

Dr. Chandra Sekhar Beera

Assoc. Professor, Department of B S & H

on
INTRODUCTION TO
ARTIFICIAL INTELLIGENCE
25th April, 2022 to 30th April, 2022

Duration of the Course : 36 hrs

Organized by

DEPARTMENT OF
BASIC SCIENCES & HUMANITIES

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

Accredited by **NBA** For UG Programmes of **EEE, ECE, CSE & IT**

KAPUJAGGARAJUPETA, VISAKHAPATNAM-530 049.

About the Institute

Vignan's Institute of Engineering For Women, established in the year 2008, has been in the forefront of technical education services especially for women engineering aspirants. It is offering Graduate and Post Graduate courses in Engineering in the streams of EEE, ECE, IT, CSE & ME. MBA is too offered. Over the years the institution has registered impressive growth rate in academics and R&D. Since the beginning the students of the college have made it a regular habit to top the performance charts of JNTUK examinations. Through several extension activities the institution is reaching out to the society nearby. The institution is having sophisticated laboratories, well ventilated class rooms, play grounds and hygienically maintained canteen facilities. Located in a lush green ambience the campus offers serene environment for studies.

Vision

To be a leading institution of women empowerment producing internationally accepted professionals with psychological strength, emotional balance and ethical values.

Mission

- M1 :** To empower women engineers through innovative teaching-learning practices.
- M2 :** To encourage for higher education and research with well-equipped laboratories.
- M3 :** To promote entrepreneurship through creativity and innovation.
- M4 :** To promote environmental sustainability and inculcate ethical, emotional and social consciousness.

About the Department

The Department of Basic Sciences & Humanities, established in the year 2008, has been the backbone of the engineering college by offering courses in Mathematics, Physics, Chemistry, Statistics, English and Environmental Science to the first year as well as second year students depending curriculum generated by the affiliating University. Apart from delivering the curricular content, the Department takes active role in imparting the necessary life skills and technical skills required for a budding engineer by including some short term courses as well. This will expand the scope and horizon of the young students. The department boasts of well qualified and experienced faculty and efficient infrastructure. The students in the first year have topped the University exams consecutively. Students regularly participate in the social service activities and co-curricular activities.

About the Course

Course on Introduction to Artificial Intelligence (AI) explores the use of conditions and applications of AI for understanding the AI concepts and terms like machine learning, deep learning and neural networks. Students will become aware of various fundamental ideas involving the futuristic area, AI such as ethics and social implications, avenues for solutions.

Objectives

By the end of this course, students should be able to;

- To acquire knowledge on intelligent systems and agents
- To be aware of formalization of knowledge,
- To understand reasoning with and without uncertainty,
- To be aware dynamics of machine learning and applications at a basic level.

Course Outcomes

The student shall be able to

- Understand what is AI, its applications and use cases and how it is transforming our lives

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN

(Approved by AICTE & Affiliated to JNTU)
Accredited by NBA for UG Programmes of EEE, ECE, CSE & IT
ISO 9001:2015, ISO 14001:2015, ISO 45001:2018 Certified Institution

- Recognize the variety of causes of procrastination and apply relevant technique to overcome these.
- Clarify and prioritize your objectives and goals, by creating more planning time.
- Adopt appropriate strategies for dealing with interruptions
- Use practical techniques for organizing work.

Course Content

- ◆ What is time management? The myths and magic of time preparing for marathon, not the sprint – exploring sustainable principles.
- ◆ Slicing the pie – how to avoid overdraft setting goals and objectives – efficiency Vs effectiveness – taking control the power of the pro-active manager.
- ◆ Prioritizing your workload – urgency vs importance planning your day – time management systems explored recognizing personal blocks & Managing and making use of Technology.
- ◆ Minimizing stress – time management as life-saver Profiling your time Dealing with typical Time Wasters.
- ◆ Techniques of Task Prioritization & Prioritizing workload and focusing the key tasks ways to say 'NO' assertively.
- ◆ Delegating tasks Action Planning Check List management

This will expand the scope and horizon of the young students. The department boasts of well qualified and experienced faculty and efficient infrastructure. The students in the first year have topped the University exams consecutively. Students regularly participate in the social service activities and co-curricular activities.

About the Course

This Time Management training course is designed to help participants develop their skills in time management to achieve more effective results in less time. One of the most repeated phrases you will hear in offices up and down the country is "we don't have enough time" - to which the response is often "work harder!" - leading to overtime, stress - and often a poorly done job! Developing techniques to make more intelligent use of time, and to prioritize and effectively manage a challenging workload can lead to a more productive workforce getting more important work done in less time and with less stress!

Objectives

- recognize the myths and reality of time management
- ▶ define their values, goals, targets and priorities
- ▶ develop a workable balance between being reactive and proactive
- ▶ plan workloads and take a positive approach to decisions and develop an effective time management system

Outcomes

The student shall be able to

- Identify your own particular time wasters and adopt strategies for reducing them.
- ▶
